Dear Buster,

On Behalf of the board of Le Jardin, I would like to take this time and thank BE-CI for the countless hours of support and service on our ongoing restoration project.

This project has been taking place for a few years now and you have been there for recommendations, documentation and completing the new design to repair our ongoing water intrusion issues. We are very satisfied with your level of service and feel very confident that your documents and management will be the saving grace of our homes.

We would be pleased to recommend BE-CI to anyone that needs your help and we look forward to continuing this relationship far beyond the project's completion.

Sincerely,

Le Jardin Board President
Walter Dulan
