Re: BECI USF Project Experience

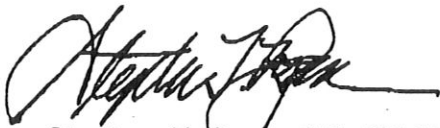

Dear Jim,

Pursuant to your request, this letter will serve as my recommendation for Building Engineering Consultants, Inc. (BECI) as a highly qualified and professional firm. This is based on my past experience with your company on University of South Florida (USF) projects when I was a project architect with William A. Hayward & Associates in Tampa, Florida. BECI provided subconsulting services at that time on the following USF projects:

- Women's Dormitory.
- Campus Library.
- Phosphate Institute.

I am pleased to provide this recommendation and wish you great success.

Very truly yours,

Stephen T. Ryan, AIA, NCARB, CCS
Specifications Consultant
